Summary

My passion for coding is new to my world. I never pictured myself in the tech field, but here I am a few experiences later, full-filling a fire inside me to create beautiful works of art through coding.

I've had several career paths and I realized my love for coding after being a technology teacher. I found myself reaching out to the program creators asking how they came up with the idea or what lead them to find the creativity in designing said program.

Now coding and trading full-time has helped me find my own happiness and also helped me find the love in the work that I do.

Skills: HTML5, CSS3, JavaScript(E6), Node.js
